PRODUCT OVERVIEW

ELECTRICAL SPECIFICATIONS

- **Installation** - Plug in, with various options, depending on region
- **Charging Amperage** - 10A up to 16A
- **Charge Circuit Interruption Device** - Ground fault protection with fully automated self-check feature that eliminates the need for monthly testing by user
- **Isolation Monitor** - Constantly checks for presence of proper safety ground and notifies user if ground is missing
- Tested to automotive standards for durability and reliability
- Multiple supply power options available to match local grid type
- Indicators tell you when the unit has power and when it is charging
- No buttons, always ready to charge

MATERIAL SPECIFICATIONS

- Operating Temperatures: -22°F to 122°F (-30°C to 50°C)
- 11" L x 4" W x 3" D (279mm L x 102mm W x 76mm D)
- Available with SAE J1772 or IEC 62196-2 (Type II) vehicle connector
- Cord Length: 20-25 feet depending on connector type (6.0 - 7.6 meters)
- NEMA 4 rated enclosure for installation indoors or outdoors, fully sealed

Keep Charging Cable Organized

The ClipperCreek Cable Cradle mounts to a wall near your electric vehicle charging station or connector holster to easily manage the cable, keeping it off the ground and wall when not in use (charging station sold separately).

NOTE: The supply circuit, output power rating and supply power plug will depend on the geographic region this product is intended for. Contact ClipperCreek at +1 877 694 4194 for product specifications in your area.
